Dear Amy and Kascheica,

Can you send me the latest versions of public documents that would give indications of the reasonably anticipated future land/building uses, especially at Parcel G? I have heard about a land use plan that has recently been updated. I have also heard about EIR language from a long time ago. Would these be the most relevant?

And can you indicate the level of official-ness? E.g., Commission voted on them? Legally enforceable? How can members of the public get access to them? Etc.

Thanks!

- Lily
